Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to an apparatus of an active inductor.
 - II. Claims 14-17 drawn to an apparatus of an oscillator.
 - III. Claims 18-23 drawn to an apparatus of an adaptive amplifier.
 - IV. Claims 24-31 drawn to an apparatus of a mixer, a doubler and a transmitter.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of group I (claims 1-13), group II (claims 14-17), group III (claims 18-23), and group IV (claims 24-31) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group VI has separate utility such as a transmitter comprising a limiter, a doubler and a mixer, group III has separate utility such as an amplifier comprising input/output active matching elements, group II has separate utility such as an oscillator comprising a RLC circuit in a feedback loop and a resonant frequency selection, group I has separate utility such as an inductor comprising fabrication substrates. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and that the search required for Group IV (claims 24-31) is not required for group I, group II or group III, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
